

FOR IMMEDIATE RELEASE

Strata Health Solutions Successfully Adopts FHIR Standard to Accelerate Patient Flow, While Improving Outcomes

Calgary, AB – May 9th, 2019 - As the **Fast Healthcare Interoperability Resources (FHIR)** integration standard takes the world by storm, Strata Health has been a pioneer amongst cutting-edge companies adopting this emerging standard for exchanging healthcare information electronically.

Using the FHIR standard, Strata Health's intelligent technology rapidly allocates specialist appointments to clients. The FHIR implementation allows users to quickly create patient records, manage patient encounters, input clinical data to match patients to appropriate specialists, and identifies the appropriate priority for completed referrals.

Strata is processing **12,000** FHIR messages per month, with over **175,000** total messages sent to date. As a result of Strata's FHIR integration, more than **70,000** patients have received timely and optimal specialist appointments.

The **2018 FHIR North Code Camp**, hosted by Mohawk College in Hamilton Ontario, focused on advancing early adoption of new upcoming FHIR standards in the Ontario health care space. Software vendors were encouraged to implement a proof of concept interface, in support of the Canadian Draft eReferral Specifications currently under development. **Strata Health** and **Caredove** successfully demonstrated FHIR, and SMART on FHIR interoperability, while participating in this Code Camp.

"Strata Health clearly sees the adoption of FHIR in all of its global markets accelerating," explains Vaughan van der Merwe, Strata Health's Vice President of IT. "As a result of the continued focus on providing robust, flexible and sustainable interconnectivity, I expect FHIR to replace many of our existing legacy interfaces, and becoming the de facto integration standard at Strata Health."

Strata Health is actively expanding its FHIR library with projects underway within Quebec, Ontario, Alberta, and the UK.

Who is Strata Health?

With almost 20 years of experience in the patient care industry, Strata Health is the leading provider of intelligent, digital tools for resource allocation, patient transitions, and patient flow innovation across the care continuum. Strata Health supports healthcare clients on three continents, helping over 1.5 million patients worldwide get the care they need faster. Strata's software solutions are improving the healthcare experience for patients, clinicians, and health jurisdictions around the world.
