- Inbound Fax Digitization
- Automated Outbound Fax
- Print to Strata Referral

Scheduling Workflows
Improved placement and scheduling workflows

"Facilitating data-driven decisions that improve access and flow resulting in enhanced experiences amongst care providers, residents and families."
— Fraser Health Authority, British Columbia

"Honestly, pathways was a sense of stability in an environment that was constantly shifting. With the pandemic hitting the way it did, when it came to work, switching back to pathways and supporting our users on the application was a point of stability for me. It was something I knew I could rely on."
— UHN Connected Care, Toronto

2021 YEAR IN REVIEW

Strata Health

Since 2017, Borders General Hospital emergency beddays for >65s have decreased by 5% and Length of Stay reduced by 11% despite admissions increasing by 7%.

- Occupied beddays
- Number Of Admissions

Reduction of almost 600 bed days despite rising hospital admission!

Borders General Hospital in collaboration with Strata Health PathWays has reduced the length of stay in emergency for patients over 65 in the last three years.

Connected 3,261 people to psychologists

In response to rising mental health issues, we connected 3,261 people to psychologists in Ontario in partnership with OPA.

27% → 1%

Reduction in patients who experience delayed discharge.

Improvements in Single Point of Discharge for Blackpool Teaching Hospitals has meant a crucial reduction in delayed discharge from 27% of patients to 1%. Strata PathWays allows for accurate assessment, streamlined data collection and enables care providers to make efficient decisions. This has been especially important during the pandemic.

"We take pride in the work we have done. Whether it's therapy or a diagnostic consultation, we're here to help. [This solution] is simple and efficient for both patients and psychologists"
— Richard Morison, CEO of the Ontario Psychological Association

"Single Point of Discharge enables Social Care and NHS colleagues to work in partnership to streamline referral management processes, reduce delays associated with multiple handovers and support a more efficient service for patients."
— Charlotte Hamer, Assistant Lead for Hospital Discharge, Blackpool Teaching Hospitals NHS Foundation Trust, UK
